PUTRA AJRIL FATAH

putraajril2@gmail.com | linkedin.com/in/ajrilfatah | Sleman, D.I. Yogyakarta | ajrilfatah.vercel.app

SUMMARY

Full Stack & Web3 Developer focused on decentralized architecture and secure systems. Proven experience in building smart contracts, ZK-proof integrations, and automated escrow systems. Passionate about solving complex data integrity challenges and eager to contribute to robust cloud security infrastructures

EDUCATION

Universitas Amikom Yogyakarta | Bachelor of Informatics 2022 – Present

Current GPA: 3.29/4.00 | Focus: Programming

EXPERIENCE

Academic

Web Programming Sep 2022 – Present

- Developed interactive web applications using HTML, CSS, JavaScript, Framework

Big Data & Predictive Analytics March 2023 – Present

- Built predictive models using some machine learning algorithms such as XGBoost to analyze datasets.

Advanced Programming, Database Design Sep 2022 – Present

- Developed backend services to support CRUD operations in web applications using My SQL, Postgre, MangoDb.

Game Programming March 2025 – August 2025

- Developed 2D games using Unity and C#.
- Focused on game logic, UI integration, and asset development.

Non-Academic

Barista – Sebaya Kopi July 2025 – August 2025

- Served coffee and non-coffee beverages according to quality standards.
- Provided customer service with a friendly and professional attitude.

Kitchen Staff – Norde Coffee February 2025 – June 2025

- Prepared food and beverages following quality and hygiene standards.
- Supported kitchen efficiency and collaborated effectively with the team.

Kitchen Staff – Sebaya Kopi June 2024 – December 2024

- Prepared food and beverages following quality and hygiene standards.
- Supported kitchen efficiency and collaborated effectively with the team.

PROJECTS

Mun Color

- A browser extension for color manipulation and analysis. Built using HTML, CSS, and JavaScript with visual processing and interactive features.

Guardian Of The Forest

- A tower defense game with a nature-guardian theme. Developed using Unity and C#. Responsible for gameplay mechanics, enemy wave systems, and UI/UX elements using Aseprite.

SathaFly

- A web-based dApp for purchasing flight tickets as NFTs using IDRX tokens. Users connect their wallets to buy tickets, and the smart contract automatically executes refunds for flight delays or cancellations without manual claims.

Mujur Jaya

- A modern company profile website built with Next.js and Supabase. Users can explore a dynamic product gallery managed in real-time and send business inquiries directly through an integrated contact form.

June Label

- A modern e-commerce website built with Laravel, Inertia.js, and React. Users can explore a premium product gallery managed effortlessly via Filament Admin Panel and shop directly through an integrated cart and checkout system.

Velipe

- Is a decentralized document verification platform built with smart contracts and a Web3 frontend. It enables secure issuance, verification, and validation of digital documents using blockchain technology and IPFS, ensuring authenticity, immutability, and trust without relying on centralized authorities.

Veilfi

- Is a decentralized yield aggregation platform built with smart contracts, zero-knowledge circuits, and a Web3 frontend. It enables users to earn yield across multiple DeFi strategies while preserving privacy through ZK proofs, ensuring secure fund management, verifiable compliance, and trust without relying on centralized intermediaries.

Gasan (In Progress)

- AI-driven fraud prevention platform for community savings (arisan), built with Python, FastAPI, and an automated escrow system. It enables communities to safely manage rotating funds while mitigating default risks through predictive analytics, ensuring secure fund management, transparent disbursements, and trust without relying on manual verification.

SKILLS

Languages & Frameworks: Laravel, Solidity, Node.js, Foundry, Laravel, Rust, Move, Python, Go
Development Tools: Git, Postman, Figma, Visual Studio, Unity, Aseprite
Soft Skills: Adaptability, Teamwork, Problem-Solving, Communication, Hospitality, Basic Video Editing, Crypto Market Analysis
